

Call for Nominations

2010 The AIC Gold Medal

Nominations are now being accepted for the 2010 The American Institute of Chemists Gold Medal Award. First presented by the AIC in 1926, the Gold Medal is the AIC's highest award. It recognizes service to the science of chemistry and to the profession of chemistry or chemical engineering in the United States. Previous winners include Nobel laureates Glenn T. Seaborg and Herbert C. Brown, as well as other renowned researchers and scientists representing the many facets of the world of chemistry. Recent medalists include Arnold O. Beckman, Harry B. Gray, Ralph F. Hirschmann, Robert L. McNeil, Jr., George Whitesides, Roald Hoffman, Oliver Smithies and Robert Grubbs.

Nominations should consist of a nominating letter with the individual's curriculum vita plus two letters of support. All nomination materials are due in The AIC Office by **December 30, 2010**, and should be mailed to

The American Institute of Chemists
Attn: Awards Nomination
315 Chestnut Street
Philadelphia, PA 19106

The award winner is expected to deliver a formal lecture on a topic relevant to the basis for winning the award during the award ceremony.

The American Institute of Chemists: Founded in 1923, The AIC advances the chemical sciences by establishing high professional standards of practice and emphasizing the professional, ethical, economic, and social status of its members for the benefit of society as a whole. The AIC engages in a broad range of programs for professional enhancement through the prestigious Fellow membership category, an awards program, certification programs, and meetings.
