

# Call for Nominations

## 2011 The AIC Chemical Pioneer Award

First presented by The AIC in 1966, the Chemical Pioneer Award recognizes chemists, chemical engineers, or their associates who have made outstanding contributions that have had a major impact on advances in chemical science and industry and/or the chemical profession. Previous winners include pioneering researchers, educators and executives representing the many facets of the world of chemistry. The AIC Chemical Pioneers include Eugene G. Rochow, Linus C. Pauling, O. A. Battista, Herbert C. Brown, C. N. R. Rao, Alan G. Marshall, Keith Carron and Sossina M. Haile.

Nominations should consist of a nominating letter with the individual's curriculum vita plus two letters of support. All nomination materials are due in The AIC Office by **December 30, 2010**, and should be mailed to

**The American Institute of Chemists**  
**Attn: Awards Nomination**  
**315 Chestnut Street**  
**Philadelphia, PA 19106**

The award winner is expected to deliver a formal lecture on a topic relevant to the basis for winning the award during the award ceremony.

**The American Institute of Chemists:** Founded in 1923, The AIC advances the chemical sciences by establishing high professional standards of practice and emphasizing the professional, ethical, economic, and social status of its members for the benefit of society as a whole. The AIC engages in a broad range of programs for professional enhancement through the prestigious Fellow membership category, an awards program, certification programs, and meetings.
